

Rashid Khan
CPO and Co-Founder
Yellow.ai
rashid@yellow.ai

Rashid Khan is the Chief Product Officer and Co-Founder at Yellow.ai (formerly known as Yellow Messenger), a leading next-gen Total Experience(TX) Automation platform, enabling enterprises to deliver human-like interactions that boost customer satisfaction and increase employee engagement at scale.

He is currently heading Yellow.ai operations in the San Francisco Bay Area.

Always enthusiastic about building the next big thing, Rashid was developing the backend systems for IoT tech at EdgeVerve, prior to co-founding Yellow.ai. With his impetus for learning and sharing knowledge in the space of AI, Rashid has authored the book - "Build Better Chatbots" which was published by Springer Press as one of the first books on Chatbots and is currently working on the second edition of the book. Rashid has been an active member in the open-source community working on the GNOME desktop environment and maintaining Tomboy Notes for mac and iOS operating systems. He has been recently recognised in Forbes 30 under 30, 2022 as one of the young gamechangers who is disrupting the Enterprise Technology industry.

An alumnus of NIT Warangal, he completed his Bachelor's Degree in Computer Science and Engineering in the year 2015.

When not working on Yellow.ai, Rashid enjoys reading a variety of books and is a motorbiking enthusiast.
